

origami stars tutorial

by minna may blog

all you need is strips of paper!

each strip should measure 8.5" x 0.5"

start off with making a ribbon

insert tab inside hole

gently pull tab through

fold down excess tab

begin folding over

again...

keep folding until you reach the end of the tab

insert little tab inside

then you'll end up with this

push in the sides with your nail

do with all five sides

and you are finished!
