### finishing

Weave in loose ends, leaving tails 2"-3" (5-7 cm) long; tails will be trimmed flush with surface of shawl after blocking. Soak shawl for at least 20 minutes. Wrap in towel to remove excess water. Lay flat, and smooth into shape. Pull out points along side edges at each "yo, k1 yo" in last row of edging and pin to finished measurements. Leave in place until thoroughly dry.

Carefully trim ends of tails.
